Title: Principal Planner, Community Development

Lead Agency: City of Sunnyvale

Project Title	Proposed Church, School & Office Use within a vacant building located on Industrial Zoned site
Lead Agency Name and Address	City of Sunnyvale PO Box 3707 Sunnyvale, CA 94088-3707
Contact Person	Ryan M. Kuchenig
Phone Number	408-730-7431
Project Location	965 E. Arques Ave.
Project Sponsor's Name	MV Development
Address	2400 Wyandotte Steet, Suite A Mountain View, CA 94043
Zoning	MS (Industrial and Service)
General Plan	Industrial
Other Public Agencies whose approval is required	None

Description of the Project: The applicant proposes a Use Permit to allow a church and school use within an existing building located in an industrial zone. The site was recently subdivided to allow the two separate buildings for individual condominium space. The proposed use would be located within a portion (30,040 s.f.) of the rear building. The remaining area would remain as general industrial/research and development office uses. The applicant will be required to obtain a building permit subsequent to planning approval of the project. The portion of the building that is affected by the proposed use will be split up into sanctuary, classroom and office uses. The use would operate seven days a week with the most demand taking place on Sundays. Weekday operation should not exceed 30 people with the exception of Friday evenings (100 people may be expected). Saturday attendance may range from 50 to 100 people at various times of the day.

The project includes additional upgrades to the existing landscaping and parking of the site. A total of 41 parking spaces will be added to the site. A majority of these parking spaces will be located at the rear of the site. Upgrades to handicap access and spaces area also included.

Surrounding Uses and Setting:

Surrounding the subject site in all directions include industrial/research and development office uses.

EVALUATION OF ENVIRONMENTAL IMPACTS

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
2. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
3. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
4. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
5. "Negative Declaration: Potentially Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section 17, "Earlier Analysis," may be cross-referenced).
6. Earlier analysis may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c) (3) (d). In this case, a brief discussion should identify the following:
7. Earlier Analysis Used. Identify and state where they are available for review.
8. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
9. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project

10. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. ☒

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared. ☐

I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. ☐

I find that the proposed project MAY have a "potential significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed. ☐

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required. ☐

16. AGRICULTURE RESOURCES: In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:					

	Potentially Significant Impact	Less than Sig. With Mitigation	Less Than Significant	No Impact	Source

Discussion:

5.b. LAND USE AND PLANNING: The proposed use is not permitted as a matter of right within the M-S Zoning District and approval of Use Permit is required in accordance with the zoning for this area. The establishment of a community center could limit existing and future operations of surrounding sites.

13.a. TRANSPORTATION / TRAFFIC: The proposed use would increase traffic to the site. The site is currently vacant. Staff does not expect the estimated levels to exceed the existing or the proposed levels of the site. The site is also located near a major arterial which should mitigate possible impacts to surrounding sites.

13.f. TRANSPORTATION / TRAFFIC: Staff is currently working with the applicant to clarify which uses will be restricted to which parts of the site, which will enable a final determination to be made regarding parking requirements. As the applicant has proposed to meet the City's requirements, this issue will be addressed through restriction to the locations and times of use on the site.

14.a. HAZARDS AND HAZARDOUS MATERIALS: The proposed project will not include the use of any hazardous materials. The Industrial & Service (MS) Zoning District allows various types of industrial uses. At this time, there are no uses within the area that operate with significant hazardous materials and would conflict with the proposed use. However, the proposed use may limit the ability of existing and future nearby uses to

operate certain types of industrial activities. Per Municipal Code, these businesses may normally operate as a matter of right within this Zoning District.
